SOFTWARE ENGINEER

Belgrade, Serbia · dulegraba03@gmail.com

EXPERIENCE

Software Engineering Intern Jul 2026 - Oct 2026
Microsoft

- Investigated font-download bottlenecks in Word for the web and developed an optimization approach from the ground up.
- Implemented and validated the solution, improving font-loading performance; used performance data to evaluate alternatives and trade-offs.
- Worked with engineers and cross-functional partners to align requirements, evaluate results, and move the solution toward adoption.

Undergraduate Teaching Assistant 2024 - Present
University of Belgrade, School of Electrical Engineering

- Assign and review programming tasks and projects, grade submissions, and provide feedback to support student learning.

SELECTED PROJECTS

Multithreaded OS Kernel C, C++, RISC-V Assembly

- Built a multithreaded operating system kernel in C and RISC-V assembly with scheduling, interrupt handling, and asynchronous context switching.
- Developed C and C++ APIs for kernel services and hardware interaction.

Focus Guard - Android Focus App Kotlin, Java

- Built an Android app for planning and tracking focus sessions, with session storage and scheduling.
- Integrated movement, light, and noise sensing with real-time warnings and AI-powered session feedback.

Collaborative Playlist App (Group Project) Django, JavaScript, SQL

- Implemented Trending and Playlist Management pages across the frontend and Django backend, including Spotify API integration.
- Designed the database schema and contributed Selenium tests and deployment work.

FAR - FPL Recommendation Agent Python, Microsoft Copilot, LLMs

- Built a solo Microsoft Hackathon agent that analyzes Fantasy Premier League player trends and proactively surfaces transfer recommendations without user prompts.

EDUCATION

University of Belgrade, School of Electrical Engineering
Master's in Software Engineering Sep 2026 - Present
Bachelor's in Software Engineering | **GPA 9.5/10** Oct 2022 - Sep 2026

TECHNICAL SKILLS

Languages: Python, Java, C/C++, TypeScript, JavaScript, Kotlin, SQL, Assembly.
Application development: Django, React, Node.js, REST APIs, SQL/NoSQL databases.
Tools & foundations: Git, Docker, Linux; algorithms, data structures, concurrency, object-oriented design.

LANGUAGES & AWARDS

Languages: Serbian (native), English (C2), Russian (B1).
Award: 3rd place, National Mathematics Competition (high school, Serbia).
